Project objective

The main objective of the project is related to the general objective of the *thematic objective 7: Improving access to the regions, developing sustainable and climate-friendly transport and communication networks and systems and contributes to its achievement by improving the transport infrastructure of the border regions Transcarpathian Region (Ukraine), Maramures County (Romania) and Szabolcs-Szatmár-Bereg (Hungary)*

Our project objectives

SPECIFIC OBJECTIVE:

Improvement of transport infrastructure in Vynohradiv City (Ukraine), Maramures County (Romania) and Barabás village (Hungary).

The specific objective will be achieved by a modern monitoring transport system of the public transport in the Maramures (Romania) and by installing pilot bus stations equipped with information technologies

The specific objective of the project corresponds to the **specific goal 1 of the Program**: Development of transport infrastructure for improving the mobility of people and goods and contributing to the improvement of the transport infrastructure of the border areas in Vynohradiv City (Ukraine), Maramures County (Romania) and Barabás Village (Hungary).

Maramures County – activities

Activity 1.1 *Acquisition of services for the modernization of public passenger transport – includes 50 GPS mobile tracking devices that were installed on buses to ensure monitoring, measurements of the indoor and outdoor air quality, optimizing routes by correlating with other traffic data sources, connectivity with the bus stations in order to transmit the data and the timetable/arriving time of the bus to the station.*

Activity 1.2 *Implementation of the modernized public transport system.*

Activity 1.3 *Operation of the modernized public transport system.*

Activity 1.4 *Acquisition of services for the modernization of bus stations – solution contests for the design of technical documentation for the modernization of bus stations. Finally, 4 demonstration, operational, bus stations were built.*

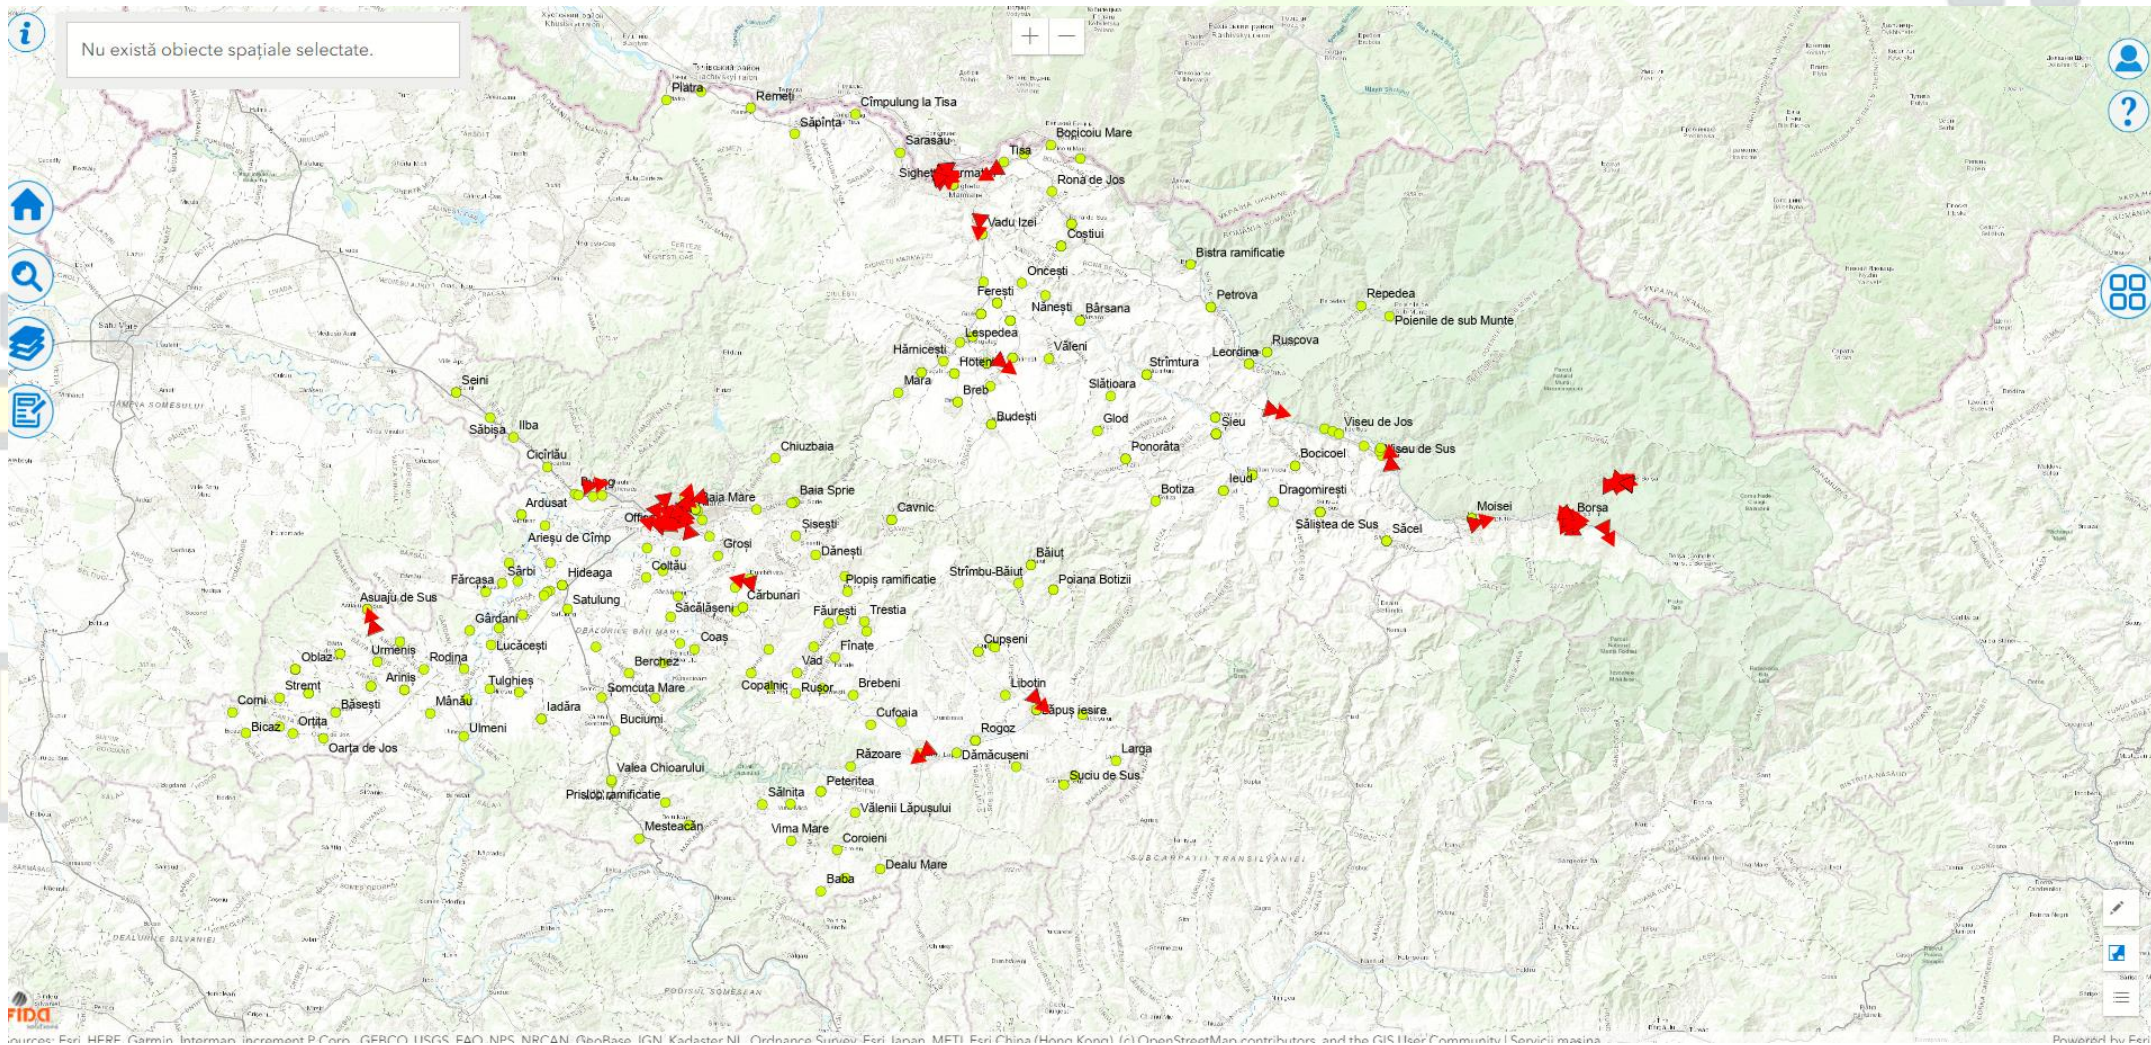

Activity 1.5 *Elaboration of technical studies for the modernization of the bus stations- Technical study for modernizing the bus stations, building the 4 model/pilot stations*

The monitoring system

- GPS mobile tracking devices
- measurements of the indoor and outdoor air quality,
- system fo optimizing routes by correlating with other traffic data sources, connectivity with the bus stations in order to transmit the data and the timetable/ arriving time of the bus to the station.
